Subject index

N-Acetyl-L-methionine, enzymatic continuous production of, from *N*-acetyl-DL-methioninamide with *Erwinia carotovora* containing a new amidase activity, 85
Acid-esterase, semisynthetic: conformational modification of ribonuclease, 98
Adenosine 5'-monophosphate, determination of, in fish and shellfish using an enzyme sensor, 207
Adhesion to a support, immobilization of yeast by, without use of a chemical agent, 221
Affinity chromatography, triazine dye, role of metal ions in: the metal mediated interaction of triazine dyes with firefly luciferase, 555
Alcohol production, continuous fermentation systems for, 194
Amidase activity, new, enzymatic continuous production of *N*-acetyl-L-methionine from *N*-acetyl-DL-methioninamide with *Erwinia carotovora* containing, 85
Amino acids, deamination of, by *Bacillus pasteurii*, 65
6-Aminopenicillanic acid, deacylation of benzylpenicillin to, with penicillin acylase: enzymatic conversion in aqueous two-phase systems, 301
Ammonium ion, acceleration of the rate of fermentation by *Saccharomyces cerevisiae* in the presence of, 375
Amylase system of *Saccharomycopsis fibuliger*, kinetics of, 549
Amylases, studies on extracellular and intracellular purified, from a thermophilic *Bacillus stearothermophilus*, 422
Aniline hydroxylase activities of haemoglobin: kinetics and mechanism, 11
Aqueous two-phase system, semicontinuous cellulase production in, with *Trichoderma reesei* Rutgers C30, 415
ArgB gene, transformation of *Aspergillus nidulans* using, 386
Arthrobacter simplex, free and immobilized, Δ^1-dehydrogenase activity of, effect of supersaturated aqueous hydrocortisone concentrations on, 113
Arthrobacter simplex immobilized as supported monolayer, dehydrogenation of cortisol by, 497
Ascorbic acid and dihydroxyfumaric acid dependent hydroxylase activity of immobilized haemoglobin, 161
Aspergillus hybrids, aspects of penicillin production in, 121
Aspergillus awamori and *Saccharomyces cerevisiae*, conversion of dextrinized cassava starch into ethanol using cultures of, 60
Aspergillus fumigatus NRC 272, thermophilic, optimization of the composition of the nutrient medium for cellulase and protein biosynthesis by, 212
Aspergillus nidulans, transformation of, using the *argB* gene, 386
Aspergillus wentii Pt 2804, crude β-D-glucosidase from, kinetic characterization of, 508

Bacillus pasteurii, deamination of amino acids by, 65
Bacillus polymyxa (1→4)-β-D-xylanase gene, molecular cloning of, in *Escherichia coli*, 271
Bacillus stearothermophilus, thermophilic, studies on extracellular and intracellular purified amylases from a, 422
Bacterial enzymes, investigation of the parameters affecting the separation of, from cell debris by tangential flow filtration, 201
Bacterial resistance and detoxification of heavy metals, 530
Bagasse, acid treated, factors in inhibiting ethanol production from D-xylose by *Pachysolen tannophilus*, 451
Benzylpenicillin, deacylation of, to 6-aminopenicillanic acid with penicillin acylase: enzymatic conversion in aqueous two-phase systems, 301
Bioaffinity phenomena and molecular immobilization: a quick-reference literature survey of recent literature on, 42, 91, 140, 186, 236, 283, 331, 379, 427, 476, 522, 565
Bioavailability of straw, improvements of: acid and enzyme hydrolysis of wheat straw pretreated with saturated lithium chloride in hydrochloric acid, 169
Biocatalysis in natural products chemistry, 242
Bioelectrochemical cell for the synthesis of (bio)chemicals, 165
Biological disposal of hazardous waste, 146
Biomass, liquefaction and saccharification of, application of cellulase and pectinase from fungal origin for, 503
Bioreactor, hollow fibre, for ethanol production: application to the conversion of lactose by *Kluyveromyces fragilis*, 117
Biosynthesis, cellulase and protein, by thermophilic *Aspergillus fumigatus* NRC 272, optimization of the composition of the nutrient medium for, 212
Biosynthesis, gibberellic acid, from whey and simulation of cultural parameters, 312
Biphasic reaction systems, effects of water on equilibria catalysed by hydrolytic enzymes in, 513

Carbohydrates, attached, effect of, on the activity of *Trichoderma viride* cellulases, 467
Carbon source regulation of cephem antibiotic production by resting cells of *Streptomyces clavuligerus* and its reversal by protein synthesis inhibitors, 155
*N*⁶-(2-Carboxyethyl)-NAD(H) and poly-(ethylene glycol)-bound NAD(H), kinetic properties of, for alcohol, lactate, malate and glyceraldehyde-3-phosphate dehydrogenases from different organisms, 538
Cassava starch, dextrinized, conversion of, into ethanol using cultures of *Aspergillus awamori* and *Saccharomyces cerevisiae*, 60
Cell debris, separation of bacterial enzymes from, by tangential flow filtration, investigation of the parameters affecting, 201
Cellobiase, hydrolysis and transglycosylation

catalysed by, kinetics and mathematical model of, 275
Cellulase production, enhanced, in fed-batch culture of *Trichoderma reesei* C30, 73
Cellulase production, semicontinuous, in an aqueous two-phase system with *Trichoderma reesei* Rutgers C30, 415
Cellulase and pectinase from fungal origin, application of, for the liquefaction and saccharification of biomass, 503
Cellulase and protein biosynthesis by thermophilic *Aspergillus fumigatus* NRC 272, optimization of the composition of the nutrient medium for, 212
Celluiases, new reducing sugar assay for the study of, 491
Cellulases, *Trichoderma viride*, effect of attached carbohydrates on the activity of, 467
Cellulases and hemicellulases from four fungi, comparative study of: mesophiles *Trichoderma reesei* and *Penicillium* sp. and thermophiles *Thielavia terrestris* and *Sporotrichum cellulophilum*, 175
Cephem antibiotic production, carbon source regulation of, by resting cells of *Streptomyces clavuligerus* and its reversal by protein synthesis inhibitors, 155
Chitosan, modified, fixation of β-D-galactosidase on: a new photoactivatable support for protein immobilization, 517
Chloroplast membranes, immobilized: kinetic aspects of their continuous use in batch and chemostat, 321
Cloning, molecular, of *Bacillus polymyxa* (1→4)-β-D-xylanase gene in *Escherichia coli*, 271
Coagulation of milk with immobilized enzymes, 46
Codeine, microbial *N*-demethylation of, by cell-free extracts of *Cunninghamella bainieri*, studies of the mechanism of, 471
Coenzyme activity of high molecular weight NAD^+ derivative covalently bound to dextran, effects of molecular weight of dextran and NAD^+ density on, 259
Cofactor/reactant addition, importance of order of: desacetoxycephalosporin C synthetase, 402
Collagenase of a new streptomycete: its induction and purification, 462
Conformational modification of ribonuclease: semisynthetic acid-esterase, 98
Continuous extraction of β-D-galactosidase from *Escherichia coli* in an aqueous two-phase system: effects of biomass concentration on partitioning and mass transfer, 325
Continuous feed stirred tank reactor, study of microencapsulated urease in, 135
Continuous feed stirred tank reactor, operational stability of immobilized D-glucose isomerase in, 359
Continuous fermentation systems for alcohol production, 194
Cortisol, dehydrogenation of, by *Arthrobacter simplex* immobilized as supported monolayer, 497
Cunninghamella bainieri, microbial *N*-demethylation of codeine by cell-free extracts of, studies on the mechanism of, 471

Deactivation kinetics, influence of intermediate activity on: series-type enzyme deactivations, 35
Deamination of amino acids by *Bacillus pasteurii*, 65
Dehydrocholic acid, enzymatic reduction of, to 12-ketochenodeoxycholic acid with NADH regeneration, 307
Δ^1-Dehydrogenase activity of free and immobilized *Arthrobacter simplex*, effect of supersaturated aqueous hydrocortisone concentrations on, 113
Dehydrogenases, alcohol, lactate, malate and glyceraldehyde-3-phosphate, from different organisms, kinetic properties of N^6-(2-carboxyethyl)-NAD(H) and poly(ethylene glycol)-bound NAD(H) for, 538
Dehydrogenation of cortisol by *Arthrobacter simplex* immobilized as supported monolayer, 497
N-Demethylation of codeine, microbial, by cell-free extracts of *Cunninghamella bainieri*, studies on the mechanism of, 471
Desacetoxycephalosporin C synthetase: importance of order of cofactor/reactant addition, 402
Detoxification of heavy metals, bacterial resistance and, 530
Dextran, effects of molecular weight of, and NAD^+ density on coenzyme activity of high molecular weight NAD^+ derivative covalently bound to dextran, 259
Dextranase from *Penicillium aculeatum*, studies on, 217
Dextrinized cassava starch, conversion of, into ethanol using cultures of *Aspergillus awamori* and *Saccharomyces cerevisiae*, 60
Dihydroxyfumaric acid and ascorbic acid dependent hydroxylase activity of immobilized haemoglobin, 161

Entrapment of L-tryptophan producing *Escherichia coli* in different matrices: activity of immobilized cells, 81
Enzymatic continuous production of *N*-acetyl-L-methionine from *N*-acetyl-DL-methioninamide with *Erwinia carotovora* containing a new amidase activity, 85
Enzymatic conversion in aqueous two-phase systems: deacylation of benzylpenicillin to 6-aminopenicillanic acid with penicillin acylase, 301
Enzymatic reduction of dehydrocholic acid to 12-ketochenodeoxycholic acid with NADH regeneration, 307
Enzyme deactivations, series-type: influence of intermediate activity on deactivation kinetics, 35
Enzyme immobilization on grafted polymeric microspheres, 317
Enzyme inhibitors, proteolytic, in potato (*Ipomoea batatas*), isolation and characterization of, 132
Enzyme sensor, determination of adenosine 5′-monophosphate in fish and shellfish using, 207
Enzymes, immobilization of, on crosslinked gelatin particles activated with various forms and complexes of titanium(IV) species, 68
Enzymes, new approaches to stabilizing: structure–stability relationships in proteins, 50
Enzymes, reutilization of, for saccharification of lignocellulosic materials, 338
Enzymic interesterification of fats: factors influencing the choice of support for immobilized lipase, 443
Erwinia carotovora containing a new amidase activity, enzymatic continuous production of *N*-acetyl-L-methionine from *N*-acetyl-DL-methioninamide with, 85
Escherichia coli, continuous extraction of β-D-galactosidase from, in an aqueous two-phase system: effects of biomass concentration on partitioning and mass transfer, 325
Escherichia coli, entrapment of L-tryptophan producing, in different matrices: activity of immobilized cells, 81
Escherichia coli, molecular cloning of *Bacillus polymyxa* (1→4)-β-D-xylanase gene in, 271
Ethanol, conversion of dextrinized cassava starch into, using cultures of *Aspergillus awamori* and *Saccharomyces cerevisiae*, 60
Ethanol in fermentation broth, estimation of, by solvent extraction and gas chromatography, 233
Ethanol and polyols, oxygen requirements for D-xylose fermentation to, by *Pachysolen tannophilus*, 447
Ethanol formation from D-xylose, and growth, mutants of *Pachysolen tannophilus* showing enhanced rates of, 254
Ethanol production from starchy materials, HTST-extrusion cooking in, 457
Ethanol production from whey permeate by immobilized yeast cells, 18
Ethanol production from D-xylose by *Pachysolen tannophilus*, factors in acid treated bagasse inhibiting, 451
Ethanol production, hollow fibre bioreactor for: application to the conversion of lactose by *Kluyveromyces fragilis*, 117

Fats, enzymic interesterification of: factors influencing the choice of support for immobilized lipase, 443
Fatty acids and oils, effect of, on molasses fermentation by distillers' yeast, 78
Fed-batch culture of *Trichoderma reesei* C30, enhanced cellulase production in, 73
Fermentation by *Saccharomyces cerevisiae* in the presence of ammonium ion, acceleration of the rate of, 375
Fermentation broth, estimation of ethanol in, by solvent extraction and gas chromatography, 233
Fermentation systems, continuous, for alcohol production, 194
Firefly luciferase: purification and immobilization, 482
Fish and shellfish, determination of adenosine 5′-monophosphate in, using an enzyme sensor, 207
Fruit juices, haze formation in, pectic substances, pectic enzymes and, 341
Fungi, comparative study of cellulases and hemicellulases from four: mesophiles *Trichoderma reesei* and *Penicillium* sp. and thermophiles *Thielavaia terrestris* and *Sporotrichum cellulophilum*, 175

β-D-Galactosidase, continuous extraction of, from *Escherichia coli* in an aqueous two-phase system: effects of biomass concentration on partitioning and mass transfer, 325
β-D-Galactosidase, fixation of, on modified chitosan, a new photoactivatable support for protein immobilization, 517
Gas chromatography and solvent extraction, estimation of ethanol in fermentation broth by, 233
Gelatin particles, crosslinked, activated with various forms and complexes of titanium-(IV) species, immobilization of enzymes on, 68

Gelatin particles, glutaraldehyde crosslinked, surface immobilization and entrapping of enzymes on, 127
Gene, *argB*, transformation of *Aspergillus nidulans* using, 386
Genetic recombination techniques and rational screens: industrial strain improvement, 290
Gibberellic acid biosynthesis from whey and simulation of cultural parameters, 312
α-D-Glucans, hydrolysis of, using glucoamylase immobilized on titanium(IV) activated porous silica, a simple kinetic model for, 365
Glucoamylase immobilized on titanium(IV) activated porous silica, hydrolysis of α-D-glucans using, a simple kinetic model for, 365
D-Glucose fermentation by *Saccharomyces cerevisiae*, reaction kinetics of, 560
D-Glucose isomerase, immobilized, operational stability of, in a continuous feed stirred tank reactor, 359
β-D-Glucosidase, crude, from *Aspergillus wentii* Pt 2804, kinetic characterization of, 508
Glutaraldehyde crosslinked gelatin particles, surface immobilization and entrapping of enzymes on, 127
Grafted polymeric microspheres, enzyme immobilization on, 317

Haemoglobin, aniline hydroxylase activities of: kinetics and mechanism, 11
Haemoglobin, immobilized, ascorbic acid and dihydroxyfumaric acid dependent hydroxylase activity of, 161
Hazardous waste, biological disposal of, 146
Haze formation in fruit juices, pectic substances, pectic enzymes and, 341
Heavy metals, bacterial resistance and detoxification of, 530
Hemicellulases and cellulases from four fungi: mesophiles *Trichoderma reesei* and *Penicillium* sp. and thermophiles *Thielavia terrestris* and *Sporotrichum cellulophilum*, 175
Herbicides, photodynamic: 1. Concept and phenomenology, 390
Hollow fibre bioreactor for ethanol production: application to the conversion of lactose by *Kluyveromyces fragilis*, 117
HTST-extrusion cooking in ethanol production from starchy materials, 457
Human interferons, purification techniques for, 101
Hybrids, *Aspergillus*, aspects of penicillin production in, 121
Hydrocortisone concentrations, supersaturated aqueous, effect of, on the Δ^1-dehydrogenase activity of free and immobilized *Arthrobacter simplex*, 113
Hydrogen sulphide, low, producing wine yeast, isolation and characterization of, 419
Hydrolysis, acid and enzyme, of wheat straw pretreated with saturated lithium chloride in hydrochloric acid: improvements of the bioavailability of straw, 169
Hydrolysis and transglycosylation catalysed by cellobiase, kinetics and mathematical model of, 275
Hydrolytic enzymes in biphasic reaction systems, effects of water on equilibria catalysed by, 513
Hydroxyalkyl methacrylate gel conjugates with oligo- and polypeptides: immobilized ligands of high stability, 31
Hydroxylase activity, ascorbic acid and dihydroxyfumaric acid dependent, of immobilized haemoglobin, 161

Immobilization, enzyme, on grafted polymeric microspheres, 317
Immobilization, molecular, and bioaffinity phenomena: a quick-reference literature survey of recent literature on, 42, 91, 140, 186, 236, 283, 331, 379, 427, 476, 522, 565
Immobilization and entrapping of enzymes on glutaraldehyde crosslinked gelatin particles, 127
Immobilization of enzymes on crosslinked gelatin particles activated with various forms and complexes of titanium(IV) species, 68
Immobilization of yeast by adhesion to a support without use of a chemical agent, 221
Immobilized *Arthrobacter simplex*, as supported monolayer, dehydrogenation of cortisol by, 497
Immobilized and free *Arthrobacter simplex*, Δ^1-dehydrogenase activity of, effect of supersaturated aqueous hydrocortisone concentrations on the, 113
Immobilized cells, activity of, entrapment of L-tryptophan producing *Escherichia coli* in different matrices, 81
Immobilized chloroplast membranes: kinetic aspects of their continuous use in batch and chemostat, 321
Immobilized enzymes, coagulation of milk with, 46
Immobilized enzymes, on porous inorganic supports via titanium(IV) species, compositions and compositional–behavioural relationships of, 228
Immobilized glucoamylase, on titanium(IV) activated porous silica, a simple kinetic model for the hydrolysis of α-D-glucans using, 365
Immobilized D-glucose isomerase, operational stability of, in a continuous feed stirred tank reactor, 359
Immobilized haemoglobin, ascorbic acid and dihydroxyfumaric acid dependent hydroxylase activity of, 161
Immobilized ligands of high stability: hydroxyalkyl methacrylate gel conjugates with oligo- and polypeptides, 31
Immobilized lipase, factors influencing the choice of support for, enzymic interesterification of fats, 443
Immobilized thermolysin, in polymer matrix by radiation polymerization, properties of, 23
Immobilized *Trichoderma reesei* cells, by the irradiation technique, properties of, 411
Immobilized yeast cells, ethanol production from whey permeate by, 18
Induction and purification of collagenase of a new streptomycete, 462
Inhibitors of protein synthesis, carbon source regulation of cephem antibiotic production by resting cells of *Streptomyces clavuligerus*, and its reversal by, 155
Interferons, human, purification techniques for, 101
Inulase and lactase, simultaneous production of, in batch and continuous cultures of *Kluyveromyces fragilis*, 263
Irradiation technique, properties of *Trichoderma reesei* cells immobilized by, 411
Isolation and characterization of some proteolytic enzyme inhibitors in potato (*Ipomoea batates*), 132

12-Ketochenodeoxycholic acid, enzymatic reduction of dehydrocholic acid to, with NADH regeneration, 307
Kinetic aspects of continuous use of immobilized chloroplast membranes, in batch and chemostat, 321
Kinetic characterization of a crude β-D-glucosidase from *Aspergillus wentii* Pt 2804, 508
Kinetic model, simple, for the hydrolysis of α-D-glucans using glucoamylase immobilized on titanium(IV) activated porous silica, 365
Kinetic properties of N^6-(2-carboxyethyl)-NAD(H) and poly(ethylene glycol)-bound NAD(H) for alcohol, lactate, malate and glyceraldehyde-3-phosphate dehydrogenases from different organisms, 538
Kinetics, deactivation, influence of intermediate activity on: series-type enzyme deactivations, 35
Kinetics, reaction of D-glucose fermentation by *Saccharomyces cerevisiae*, 560
Kinetics of the amylase system of *Saccharomycopsis fibuliger*, 549
Kinetics and mathematical model of hydrolysis and transglycosylation catalysed by cellobiase, 275
Kinetics and mechanism of aniline hydroxylase activities of haemoglobin, 11
Kluyveromyces fragilis, conversion of lactose by, hollow fibre bioreactor for ethanol production, application to, 117
Kluyveromyces fragilis, batch and continuous cultures of, simultaneous production of inulase and lactase in, 263

Lactase, and inulase, simultaneous production of, in batch and continuous cultures of *Kluyveromyces fragilis*, 263
Lactose, conversion of, by *Kluyveromyces fragilis*, hollow fibre bioreactor for ethanol production, application to, 117
Ligands, immobilized, of high stability: hydroxyalkyl methacrylate gel conjugates with oligo- and polypeptides, 31
Lignins, microbial degradation of, recent advances in studies of the mechanisms of, 434
Lignocellulosic materials, saccharification of, reutilization of enzymes for, 338
Lipase, immobilized, factors influencing the choice of support for, enzymic interesterification of fats, 443
Literature survey: A quick-reference literature survey of recent literature on molecular immobilization and bioaffinity phenomena, 42, 91, 140, 186, 236, 283, 331, 379, 427, 476, 522, 565
Luciferase, firefly, the metal mediated interaction of triazine dyes with: role of metal ions in triazine dye affinity chromatography, 555
Luciferase, firefly, purification and immobilization, 482

Mathematical model and kinetics of hydrolysis and transglycosylation catalysed by cellobiase, 275
Metals heavy, bacterial resistance and detoxification of, 530
Microbial degradation of lignins, recent advances in studies of the mechanisms, of, 434
Microbial reductions of the sesquiterpene quadrone, 543

Microencapsulated urease, study of, in a continuous feed stirred tank reactor, 135
Microspheres, grafted polymeric, enzyme immobilization on, 317
Milk, coagulation of, with immobilized enzymes, 46
Molasses fermentation by distillers' yeast, effect of oils and fatty acids on, 78
Molecular cloning of *Bacillus polymyxa* (1→4)-β-D-xylanase gene in *Escherichia coli*, 271
Mutagenesis and random screening procedures: industrial strain improvement, 3
Mutants of *Pachysolen tannophilus* showing enhanced rates of growth and ethanol formation from D-xylose, 254

NAD^+ derivative, high molecular weight, covalently bound to dextran, effects of molecular weight of dextran and NAD^+ density on coenzyme activity of, 259
NADH regeneration, enzymatic reduction of dehydrocholic acid to 12-ketochenodeoxycholic acid with, 307
Natural products chemistry, biocatalysis in, 242
Nutrient medium, optimization of the composition of, for cellulase and protein biosynthesis by thermophilic *Aspergillus fumigatus* NRC 272, 212

Oils and fatty acids, effect of, on molasses fermentation by distillers' yeast, 78
Operational stability of immobilized D-glucose isomerase in a continuous feed stirred tank reactor, 359
Optimization of the composition of the nutrient medium for cellulase and protein biosynthesis by thermophilic *Aspergillus fumigatus* NRC 272, 212
Oxygen requirements for D-xylose fermentation to ethanol and polyols by *Pachysolen tannophilus*, 447

Pachysolen tannophilus, factors in acid treated bagasse inhibiting ethanol production from D-xylose by, 451
Pachysolen tannophilus, mutants of, showing enhanced rates of growth and ethanol formation from D-xylose, 254
Pachysolen tannophilus, oxygen requirements for D-xylose fermentation to ethanol and polyols by, 447
Patent reports, 44, 93, 142, 188, 238, 285, 333, 381, 429, 478, 524, 567
Pectic enzymes, pectic substances, and haze formation in fruit juices, 341
Pectic materials, studies on the growth of *Saccharomycopsis fibuliger* on, 350
Pectic substances, pectic enzymes and haze formation in fruit juices, 341
Pectinase and cellulase, from fungal origin, application of, for the liquefaction and saccharification of biomass, 503
Pectolytic activity of the yeast *Saccharomycopsis fibuliger*, an investigation into, 405
Penicillin acylase, deacylation of benzylpenicillin to 6-aminopenicillanic acid with: enzymatic conversion in aqueous two-phase systems, 301
Penicillin production in *Aspergillus* hybrids, 121
Penicillium aculeatum, studies on dextranase from, 217
Penicillium janthinellum, occurrence of a procellulase in the culture filtrates of, 371
Peptides, oligo- and poly-, hydroxylalkyl methacrylate gel conjugates with: immobilized ligands of high stability, 31
Phosphate, selective determination of, photomicrobial sensors for, 355
Photoactivatable support for protein immobilization, a new: fixation of β-D-galactosidase on modified chitosan, 517
Photodynamic herbicides: 1. Concept and phenomenology, 390
Photomicrobial sensors for selective determination of phosphate, 355
Poly(ethylene glycol)-bound NAD(H) and N^6-(carboxyethyl)-NAD(H), kinetic properties of, for alcohol, lactate, malate and glyceraldehyde-3-phosphate dehydrogenases from different organisms, 538
Polymer matrix, properties of thermolysin immobilized in, by radiation polymerization, 23
Polymeric microspheres, grafted, enzyme immobilization on, 317
Polysaccharides, water-soluble, stabilization of proteins by modification with, 27
Porous inorganic supports, enzymes immobilized on, via titanium(IV) species, compositions and compositional–behavioural relationships of, 228
Potato (*Ipomoea batatas*), isolation and characterization of some proteolytic enzyme inhibitors in, 132
Procellulase, occurrence of, in the culture filtrates of *Penicillium janthinellum*, 371
Protein immobilization, a new photoactivatable support for: fixation of β-D-galactosidase on modified chitosan, 517
Protein synthesis inhibitors, carbon source regulation of cephem antibiotic production by resting cells of *Streptomyces clavuligerus* and its reversal by, 155
Proteins, stabilization of, by modification with water-soluble polysaccharides, 27
Proteins, structure–stability relationships in: new approaches to stabilizing enzymes, 50
Proteolytic enzyme to solubilize lean beef tissue, selection of, 181
Proteolytic enzyme inhibitors in potato (*Ipomoea batatas*), isolation and characterization of, 132
Purification techniques for human interferons, 101

Quadrone, sesquiterpene, microbial reductions of, 543

Radiation polymerization, properties of thermolysin immobilized in polymer matrix by, 23
Random screening procedures and mutagenesis: industrial strain improvement, 3
Rational screens and genetic recombination techniques: industrial strain improvement, 290
Reactor, continuous feed stirred tank, study of microencapsulated urease in, 135
Reducing sugar assay for the study of cellulases, 491
Reutilization of enzymes for saccharification of lignocellulosic materials, 338
Ribonuclease, conformational modification of: semisynthetic acid-esterase, 98

Saccharification of lignocellulosic materials, reutilization of enzymes for, 338
Saccharomyces cerevisiae, acceleration of the rate of fermentation by, in the presence of ammonium ion, 375
Saccharomyces cerevisiae and *Aspergillus awamori*, conversion of dextrinized cassava starch into ethanol using cultures of, 60
Saccharomyces cerevisiae, reaction kinetics of D-glucose fermentation by, 560
Saccharomycopsis fibuliger, studies on the growth of, on pectic materials, 350
Saccharomycopsis fibuliger, an investigation into the pectolytic activity of, 405
Saccharomycopsis fibuliger, kinetics of the amylase system of, 549
Semisynthetic acid-esterase: conformational modification of ribonuclease, 98
Sensor, enzyme, determination of adenosine 5′-monophosphate in fish and shellfish using, 207
Sensors, photomicrobial, for selective determination of phosphate, 355
Separation of bacterial enzymes from cell debris by tangential flow filtration, investigation of the parameters affecting, 201
Simulation of cultural parameters, gibberellic acid biosynthesis from whey and, 312
Solubilization of lean beef tissue, selection of a proteolytic enzyme for, 181
Solvent extraction and gas chromatography, estimation of ethanol in fermentation broth by, 233
Stabilization of proteins by modification with water-soluble polysaccharides, 27
Stabilizing enzymes, new approaches to: structure–stability relationships in proteins, 50
Starch, cassava, dextrinized, conversion, into ethanol using cultures of *Aspergillus awamori* and *Saccharomyces cerevisiae*, 60
Starchy materials, HTST-extrusion cooking in ethanol production from, 457
Strain improvement, industrial: mutagenesis and random screening procedures, 3
Strain improvement, industrial: rational screens and genetic recombination techniques, 290
Straw, improvements of the bioavailability of: acid and enzyme hydrolysis of wheat straw pretreated with saturated lithium chloride in hydrochloric acid, 169
Streptomyces clavuligerus, carbon source regulation of cephem antibiotic production by resting cells of, and its reversal by protein synthesis inhibitors, 155
Streptomycete, new, collagenase of, its induction and purification, 462
Structure–stability relationships in proteins: new approaches to stabilizing enzymes, 50
Support, immobilization of yeast by adhesion to, without use of a chemical agent, 221
Supports, porous inorganic, compositions and compositional–behavioural relationships of enzymes immobilized on, via titanium(IV) species, 228
Synthesis of (bio)chemicals, use of a bioelectrochemical cell for, 165

Thermolysin immobilized in polymer matrix by radiation polymerization, properties of, 23
Thermophilic *Bacillus stearothermophilus*, studies on extracellular and intracellular purified amylases from, 422
Titanium(IV) activated porous silica, glucoamylase immobilized on, a simple kinetic model for the hydrolysis of α-D-glucans using, 365

Titanium(IV) species, compositions and compositional–behavioural relationships of enzymes immobilized on porous inorganic supports via, 228
Titanium(IV) species, immobilization of enzymes on crosslinked gelatin particles activated with various forms and complexes of, 68
Transformation of *Aspergillus nidulans* using the *argB* gene, 386
Triazine dyes, the metal mediated interaction of, with firefly luciferase: role of metal ions in triazine dye affinity chromatography, 555
Trichoderma reesei cells immobilized by the irradiation technique, properties of, 411
Trichoderma reesei C30, fed-batch culture of, enhanced cellulase production in, 73
Trichoderma reesei Rutgers C30, semi-continuous cellulase production in an aqueous two-phase system with, 415
Trichoderma viride cellulases, effect of attached carbohydrates on the activity of, 467
L-Tryptophan producing *Escherichia coli*, entrapment of, in different matrices: activity of immobilized cells, 81
Two-phase system, aqueous, continuous extraction of β-D-galactosidase from *Escherichia coli* in: effects of biomass concentration on partitioning and mass transfer, 325
Two-phase systems, aqueous, enzymatic conversion in: deacylation of benzylpenicillin to 6-aminopenicillanic acid with penicillin acylase, 301

Urease, microencapsulated, study of, in a continuous feed stirred tank reactor, 135

Waste, hazardous, biological disposal of, 146
Water, effects of, on equilibria catalysed by hydrolytic enzymes in biphasic reaction systems, 513
Wheat straw pretreated with saturated lithium chloride in hydrochloric acid, acid and enzyme hydrolysis of: improvements of the bioavailability of straw, 169
Whey, gibberellic acid biosynthesis from, and simulation of cultural parameters, 312
Whey permeate, ethanol production from, by immobilized yeast cells, 18
Wine yeast, low hydrogen sulphide producing, isolation and characterization of, 419

(1→4)-β-D-Xylanase, *Bacillus polymyxa*, gene, molecular cloning of, in *Escherichia coli*, 271
D-Xylose, factors in acid treated bagasse inhibiting ethanol production from, by *Pachysolen tannophilus*, 451
D-Xylose, mutants of *Pachysolen tannophilus* showing enhanced rates of growth and ethanol formation from, 254
D-Xylose fermentation to ethanol and polyols by *Pachysolen tannophilus*, oxygen requirements for, 447

Yeast, distillers', effect of oils and fatty acids on molasses fermentation by, 78
Yeast, immobilization of, by adhesion to a support without use of a chemical agent, 221
Yeast, wine, isolation and characterization of low hydrogen sulphide producing, 419
Yeast cells, immobilized, ethanol production from whey permeate by, 18

Reprints

Reprints of all articles in this journal are available in quantities of 100 or more

Reprints are essential–

- for the company that wants to distribute impartial comment on its activities to potential customers and clients
- for the company that wants to up-date its technical staff on new techniques and new technologies
- for the company that wants to publicize its research and development work
- for the training course organizer who wants to assemble key reading material for his students
- for the university or technical college lecturer who wants to distribute the latest information on a topic under study

For full details of prices and availability of reprints, please write to
